Team Evaluation

Team Number: 2
My Name: Gurumanie Singh Dhiman

This peer and self-evaluation of teamwork are intended to help you reflect on behaviors and attitudes that support effective teams on projects and in the workplace.

These evaluation numbers will not be used directly in grading group members. You will receive credit for completing the evaluation and taking a professional approach to reviewing your and your group's performance. In addition to the grade assigned to this peer evaluation, the team evaluation may only result in a lower project/assignment score for an individual student if there is group consensus across evaluation criteria that the individual did not contribute to the project/assignments.

Complete the tables on the next page. Write the name of each of your group members in a separate column.

For each person, indicate the extent to which you agree with the statement on the left, using a scale of 1-4 (**1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree**). Total the numbers in each column.

When evaluating your teammates, you may not assign identical scores to all team members. Each team member's score should reflect real differences in contribution, engagement, effort, and performance. Please evaluate each person individually based on their actual contributions to the project.

1. Describe your most significant contribution to your team.

Coming up with the idea for the final project. Although we ended up going with someone else's idea in the end. Additionally, finished drafting the report introduction, overview and presentation slides for the entire team along with my sections.

2. Describe something you learned about working in a group from this class that you will carry into your next group experience.

I liked how respectful everyone was when coming up with their ideas. Even those who did not have any ideas tried to contribute by adding onto someone else's ideas that were brought up.

3. Highest Contributor Name: Cameron

Reason for selecting this person: Helped me take over some presentation slides since mine were already hitting 2mins and 30 seconds.

4. Lowest Contributor Name: Shivansh

Reason for selecting this person: He finished his part of the project, however he delayed starting it until the last day. (Had me a little worried that he might not finish his section of the report/presentation)
