

LOAD READY

Case 1

- We could do a timed check after Weight on Wheels (WOW) is triggered.
- Each of these is a gpio switch (3 switches) -> 1 for WOW, 1 for Parking Brake, 1 for Unboard plane.
- Case 1 (Manned): GPIO sequence turns on 3 green lights then the operator manually starts a data load

LOAD READY

Case 2

- We could do a timed check after Weight on Wheels (WOW) is triggered.
- Each of these is a gpio switch (3 switches) -> 1 for WOW, 1 for Parking Brake, 1 for Unboard plane.
- Situation 2 (Automatic): GPIO sequence after 3 green lights triggers data load automatically
