

Lab Assignment #2

27.67.83.0/24 Subnet

1. Started by trying to ping some of the IP's such as:

ping 27.67.83.1

ping 27.67.83.2

Not sure why I tried starting with the above.

2. Then I started properly scanning by using nmap command:

nmap -sn 27.67.83.0/24

Found 12 hosts up:

27.67.83.7

27.67.83.10

27.67.83.20

27.67.83.21

27.67.83.54

27.67.83.83

27.67.83.90

27.67.83.92

27.67.83.97

27.67.83.101

27.67.83.127

27.67.83.204

3. Next, to find out the services running and OS for the machine I ran the nmap command:

nmap -sV -sC -O 27.67.83.0/24 -oN lab2_servicesAndOS.txt

(The above command needs sudo to run)

After the above command was done running it ended up finding 13 hosts instead. The extra host was just 27.67.83.254 and it is also included in the table. Using the output file generated I was able to consolidate all the details from it based on IP addresses one at a time into the table given below.

IP Address	Port	Service / Version	OS
27.67.83.7	80/tcp	HTTP — Apache httpd 2.4.7 (Ubuntu)	Linux 3.2 – 4.9
27.67.83.10	—	None detected — All 1000 ports closed	Unknown
27.67.83.20	7/tcp	Echo	FreeBSD 6.2–6.4-STABLE
	13/tcp	Daytime	
	19/tcp	Chargen	
	21/tcp	FTP — FreeBSD ftpd 6.00LS	
	22/tcp	SSH — OpenSSH 4.5p1 FreeBSD	
	23/tcp	Telnet — BSD-derived telnetd	
	37/tcp	Time — RFC868 (32-bit)	
27.67.83.21	21/tcp	FTP	FreeBSD 7.0 – 10.0
	22/tcp	SSH — OpenSSH 5.1p1 FreeBSD	
	23/tcp	Telnet	
	79/tcp	Finger — FreeBSD fingerd	
	111/tcp	RPCbind — v2-4	
	139/tcp	NetBIOS/SMB — Samba smbd 3.0.32	
	445/tcp	SMB — Samba 3.0.32	
	2049/tcp	NFS — v2-3 (RPC #100003)	

27.67.83.54	22/tcp	SSH — OpenSSH 3.4p1	<i>Linux 2.4.18</i>
	111/tcp	RPCbind — v2	
	6000/tcp	X11	
	32768/tcp	Status — RPC #100024	
27.67.83.83	21/tcp	FTP — Microsoft ftpd 3.0	<i>Windows NT 4.0 SP5–SP6a</i>
	70/tcp	Gopher — Windows gopherd	
	80/tcp	HTTP — Microsoft IIS 3.0	
	135/tcp	MSRPC — Microsoft RPC	
	139/tcp	NetBIOS/SMB — Windows NT 4.0 netbios-ssn	
	1027/tcp	MSRPC — Microsoft Windows RPC	
27.67.83.90	—	None detected — All 1000 ports closed	<i>Unknown</i>
27.67.83.92	22/tcp	SSH — OpenSSH 3.5p1	<i>Linux 2.4.18 – 2.4.35</i>
	111/tcp	RPCbind — v2	
	6000/tcp	X11	
	32768/tcp	Status — RPC #100024	
27.67.83.97	7/tcp	Echo	<i>Windows 2000 SP0/SP2/SP4</i>
	9/tcp	Discard	
	13/tcp	Daytime — Microsoft Windows USA daytime	
	17/tcp	QOTD — Windows qotd (English)	
	19/tcp	Chargen	
	21/tcp	FTP — Microsoft ftpd 5.0	
	25/tcp	SMTP — Microsoft ESMTP 5.0.2195.6713	
	42/tcp	WINS — Microsoft Windows Wins	
	53/tcp	DNS	
	80/tcp	HTTP — Microsoft IIS 5.0	
	119/tcp	NNTP — Microsoft NNTP 5.00.0984	
	135/tcp	MSRPC — Microsoft Windows RPC	
	139/tcp	NetBIOS — Microsoft Windows netbios-ssn	
	443/tcp	HTTPS	
	445/tcp	SMB — Windows 2000 microsoft-ds	
	563/tcp	SNEWS	
	1025–1036/tcp	MSRPC — Microsoft Windows RPC	
	3372/tcp	MSDTC — Microsoft DTC	
27.67.83.101	22/tcp	SSH — OpenSSH 4.3	<i>Linux 2.6.9 – 2.6.30</i>
	111/tcp	RPCbind — v2	
27.67.83.127	—	None detected — All 1000 ports closed	<i>Unknown</i>
27.67.83.204	135/tcp	MSRPC — Microsoft Windows RPC	<i>Windows XP SP2/SP3 or Server 2003</i>
	139/tcp	NetBIOS/SMB — Microsoft Windows netbios-ssn	
	445/tcp	SMB — Windows XP microsoft-ds	
	3389/tcp	RDP — Microsoft Terminal Services	
27.67.83.254	—	None detected — All 1000 ports filtered	<i>Unknown</i>
